

ARTICOLI SU RIVISTE SCIENTIFICHE

1. Cola G., Mariani L., Toscano S., Romano D., Ferrante A. (2020). Comparison of Greenhouse Energy Requirements for Rose Cultivation in Europe and North Africa, *Agronomy* 2020, 10, 422; doi:10.3390/agronomy10030422
2. Bononi F., Tateo F., Failla O., Quaglia G., (2020). Meteorological Based Modeling of $\delta^{18}O$ Values for Wines with the “Prosecco” Controlled Designation of Origin, *American Journal of Enology and Viticulture*, DOI: 10.5344/ajev.2020.19050
3. Cola G., Mariani L., Magradze D., Failla O. (2019). Changes in thermal resources and limitations for Georgian viticulture, *Australian Journal of Viticulture*, doi: 10.1111/ajgw.12412
4. Parisi S.G., Cola G., Gilioli G., Mariani L. (2018). Modeling and improving Ethiopian pasture systems, *Int J Biometeorol* <https://doi.org/10.1007/s00484-017-1492-0>
5. Ferrante A., Mariani L. (2018). Agronomic Management for Enhancing Plant Tolerance to Abiotic Stresses: High and Low Values of Temperature, Light Intensity, and Relative Humidity, *Horticulturae* 2018, 4, 21; doi:10.3390/horticulturae4030021
6. Mariani L., Cola G., Maghradze D., Failla O., Zavatti F., 2018. Influence of climate cycles on grapevine domestication and ancient migrations in Eurasia, *Science of the Total Environment* 635 (2018) 1240–1254
7. Panno A., Carrus A., Laforteza R., Mariani L., Sanesi G., 2018. Nature-based solutions to promote human resilience and wellbeing in cities during increasingly hot summers, *Environmental Research* 159 (2017) 249–256
8. Mariani L, Ferrante A. (2017). Agronomic Management for Enhancing Plant Tolerance to Abiotic Stresses – Drought Salinity Hypoxia and Lodging, *Horticulturae* 2017, 3, 52; doi:10.3390/horticulturae3040052.
9. Mariani L., Zavatti F., 2017. Multi-scale approach to Euro-Atlantic climatic cycles based on phenological time series air temperatures and circulation indexes, *Science of the Total Environment* 593–594 (2017), 253–262.
10. Mariani L., 2017. Carbon plants nutrition and global food security, *Eur. Phys. J. Plus* (2017) 132 : 69
11. Mariani L., Zavatti F., 2017. Multi-scale approach to Euro-Atlantic climatic cycles based on phenological time series air temperatures and circulation indexes, *Science of the Total Environment* 593–594 (2017) 253–262
12. Mariani L., Cola G., Maghradze D., Failla O., Zavatti F., 2018. Influence of climate cycles on grapevine domestication and ancient migrations in Eurasia, *Science of the Total Environment* 635 (2018) 1240–1254
13. McGovern P., Jalabadze M., Batiuk S., Callahan M.P., Smith K.E., Hall G.R., Kvavadze E., Maghradze D., Rusishvili N., Bouby L., Failla O., Cola G., Mariani L., Boaretto E., Bacilieri R., This P., Wales N., Lordkipanidze D., 2017. Early Neolithic wine of Georgia in the South Caucasus, *Proceedings of the national Academy of Sciences*, www.pnas.org/cgi/doi/10.1073/pnas.1714728114
14. Mariani L., Zavatti F., 2017. Multi-scale approach to Euro-Atlantic climatic cycles based on phenological time series air temperatures and circulation indexes, *Science of the Total Environment* 593–594 (2017), 253–262.

15. Mariani L., 2017. Carbon plants nutrition and global food security, *Eur. Phys. J. Plus* (2017) 132 : 69
16. Parisi SG, Antoniazzi MM, Cola G, Lovat L, Mariani L, Moreale G, Zoltan K, Calò A,, 2014. Spring thermal resources for grapevine in Koszeg (Hungary) deduced from a very long pictorial time series (1740 – 2009), *Climatic change*, DOI 10.1007/s10584-014-1220-2.
